Source Title: Haydon Bridge

Accessibility Review (Guidelines: **WCAG 2.0 (Level AA)**) Report on known problems (37 found):

1.3 Adaptable: Create content that can be presented in different ways (for example simpler layout) without losing information or structure.

Success Criteria 1.3.1 Info and Relationships (A)

Check 57: input element, type of "text", missing an associated label.

Repair: Add a label element that surrounds the control's label. Set the for attribute on the label element to the same value as the id attribute of the control. And/or add a title attribute to the input element. And/or create a label element that contains the input element.

✖ Line 196, Column 3:

```
<input name="zoom_query" type="text" class="search" onfocus="javascript: if(this.value == 'Search si ...
```

Check 213: input element, type of "text", has no text in label.

Repair: Add text to the input element's associated label that describes the purpose or function of the control.

✖ Line 196, Column 3:

```
<input name="zoom_query" type="text" class="search" onfocus="javascript: if(this.value == 'Search si ...
```

1.4 Distinguishable: Make it easier for users to see and hear content including separating foreground from background.

Success Criteria 1.4.3 Contrast (Minimum) (AA)

Check 304: The contrast between the colour of selected link text and its background is not sufficient to meet WCAG2.0 Level AA.

Repair: Use a colour contrast evaluator to determine if selected link text and background colours provide a contrast ratio of 4.5:1 for standard text, or 3:1 for larger text. Change colour codes to produce sufficient contrast.

Success Criteria 1.4.4 Resize text (AA)

Check 177: font used.

Repair: Remove the font element from the document.

✘ **Line 200, Column 31:**

```
<font color="#C2956C"><strong>HOME</strong></font>
```

2.1 Keyboard Accessible: Make all functionality available from a keyboard.

Success Criteria 2.1.1 Keyboard (A)

Check 107: onmouseover event handler missing onfocus event handler.

Repair: Add an onfocus handler to your script that performs the same function as the onmouseover handler.

✘ **Line 57, Column 1382:**

```
<a href="community.php" onmouseout="MM_swapImgRestore()"  
onmouseover="MM_swapImage('CommunityButton' ...
```

✘ **Line 187, Column 286:**

```
<a href="http://ec.europa.eu/agriculture/rurdev/index_en.htm" target="_blank" onblur="MM_swapImgRest ...
```

3.3 Input Assistance: Help users avoid and correct mistakes.

Success Criteria 3.3.2 Labels or Instructions (A)

Check 188: Label text is empty.

Repair: Add text to the label element.

✘ **Line 196, Column 3:**

```
<input name="zoom_query" type="text" class="search" onfocus="javascript: if(this.value == 'Search si ...
```

✘ **Line 197, Column 3:**

```
<input name="submit" type="image" class="search" src="images/search.gif" border=0 alt="search site" ...
```

4.1 Compatible: Maximize compatibility with current and future user agents, including assistive technologies.

Success Criteria 4.1.1 Parsing (A)**Check 185: id attribute is not unique.**

Repair: Modify the id attribute value so it is unique.

✖ Line 218, Column 1:

<body onload="MM_preloadImages('images/home-on.jpg','images/visitors-on.jpg','images/services-on.jpg ...'(footer)

Report on likely problems (7 found):

1.3 Adaptable: Create content that can be presented in different ways (for example simpler layout) without losing information or structure.

Success Criteria 1.3.1 Info and Relationships (A)

Check 82: p element may be misused (could be a header).

⚠ Line 63, Column 9:

```
<p style="margin-top: 0;"><strong>News Headlines</strong></p>
```

⚠ Line 66, Column 1:

```
<p class="link style14" style="margin-top: 0;"><strong><a href="https://www.northumberland.gov.uk/co ...
```

⚠ Line 76, Column 1:

```
<p class="style1" style="margin-bottom: 0;"><strong>Library Closure</strong></p>
```

⚠ Line 121, Column 6:

```
<p style="margin-top: 0; margin-bottom: 0;"><strong>Contacts:</strong></p>
```

⚠ Line 200, Column 28:

```
<p><font color="#C2956C"><strong>HOME</strong></font></p>
```

2.4 Navigable: Provide ways to help users navigate, find content, and determine where they are.

Success Criteria 2.4.4 Link Purpose (In Context) (A)

Check 173: Suspicious link text (contains placeholder text).

⚠ Line 110, Column 58:

```
<a href="HaydonBridgeArchive.php" class="link"><strong>Click Here</strong></a>
```

⚠ Line 170, Column 40:

```
<a href="http://www.haydon-news.co.uk" target="_blank" class="link"><strong>Click Here</strong></a>
```

Report on potential problems (177 found):

1.1 Text Alternatives: Provide text alternatives for any non-text content

Success Criteria 1.1.1 Non-text Content (A)

Check 8: img element may require a long description.

Line 57, Column 23:

Line 187, Column 543:

```

### Success Criteria 3.3.4 Error Prevention (Legal, Financial, Data) (AA)

**Check 269: Form submission data may not be presented to the user before final acceptance of an irreversible transaction.**

**Line 195, Column 3:**

```
<form action="search.php" method="GET" style="margin-bottom: 0">
<input name="zoom_query" type="t ...
```

**Check 272: Form may delete information without allowing for recovery.** **Line 195, Column 3:**

```
<form action="search.php" method="GET" style="margin-bottom: 0">
<input name="zoom_query" type="t ...
```

## Report on HTML validation (51 found):

**Note: Results are provided by <http://validator.w3.org/>**

✘ **Line 6, Column 73:** end tag for "meta" omitted, but OMITTAG NO was specified

```
<meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
```

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with "/>" instead of ">".

◆ **Line 6, Column 1:** start tag was here

```
<meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
```

✘ **Line 9, Column 12:** there is no attribute "NAME"

```
<META NAME="SEARCH ENGINES" CONTENT="Google, AltaVista, AOL, Yahoo, WebCrawler,...">
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✘ **Line 9, Column 37:** there is no attribute "CONTENT"

```
<META NAME="SEARCH ENGINES" CONTENT="Google, AltaVista, AOL, Yahoo, WebCrawler,...">
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this

element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

 **Line 9, Column 167:** element "META" undefined

..., Excite, Hotbot, Lycos, Magellan, LookSmart, UkIndex, CNET, UKDirectory, MSN">

You have used the element named above in your document, but the document type you are using does not define an element of that name. This error is often caused by:

incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Frameset" document type to get the "<frameset>" element),  
by using vendor proprietary extensions such as "<spacer>" or "<marquee>" (this is usually fixed by using CSS to achieve the desired effect instead).  
by using upper-case tags in XHTML (in XHTML attributes and elements must be all lower-case).

 **Line 10, Column 12:** an attribute value specification must be an attribute value literal unless SHORTTAG YES is specified

```
<META NAME=REVISIT-AFTER CONTENT=DAILY>
```

 **Line 10, Column 34:** an attribute value specification must be an attribute value literal unless SHORTTAG YES is specified

```
<META NAME=REVISIT-AFTER CONTENT=DAILY>
```

**Line 10, Column 39:** element "META" undefined

```
<META NAME=REVISIT-AFTER CONTENT=DAILY>
```

You have used the element named above in your document, but the document type you are using does not define an element of that name. This error is often caused by:

incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Frameset" document type to get the "<frameset>" element),

by using vendor proprietary extensions such as "<spacer>" or "<marquee>" (this is usually fixed by using CSS to achieve the desired effect instead).

by using upper-case tags in XHTML (in XHTML attributes and elements must be all lower-case).

✘ **Line 66, Column 169:** there is no attribute "target"

...nd-advice-on-Coronavirus.aspx" target="_blank" class="link">Here<...

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✖ **Line 145, Column 61:** document type does not allow element "ul" here; assuming missing "li" start-tag

```
<ul style="margin-top: 0;"><ul style="margin-bottom: 0">
```

✖ **Line 158, Column 8:** end tag for "li" omitted, but OMITTAG NO was specified

```
</ul>
```

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with ">" instead of ">".

ⓘ **Line 145, Column 33:** start tag was here

```
<ul style="margin-top: 0;"><ul style="margin-bottom: 0">
```

✖ **Line 159, Column 11:** character data is not allowed here

```
<ul>And gateway to:
```

You have used character data somewhere it is not permitted to appear. Mistakes that can cause this error include:

putting text directly in the body of the document without wrapping it in a container element (such as a `<p>aragraph</p>`), or forgetting to quote an attribute value (where characters such as "%" and "/" are common, but cannot appear without surrounding quotes), or using XHTML-style self-closing tags (such as `<meta ... />`) in HTML 4.01 or earlier. To fix, remove the extra slash ('/') character. For more information about the reasons for this, see Empty elements in SGML, HTML, XML, and XHTML.

✘ **Line 160, Column 32:** document type does not allow element "ul" here; assuming missing "li" start-tag

```
<ul style="margin-bottom: 0">
```

✘ **Line 166, Column 8:** end tag for "li" omitted, but OMITTAG NO was specified

```
</ul></p>
```

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with `</>` instead of `>`.

📌 **Line 160, Column 4:** start tag was here

```
<ul style="margin-bottom: 0">
```

✘ **Line 166, Column 12:** end tag for element "p" which is not open

```
</ul></p>
```

The Validator found an end tag for the above element, but that element is not currently open. This is often caused by a leftover end tag from an element that was removed during editing, or by an implicitly closed element (if you have an error related to an element being used where it is not allowed, this is almost certainly the case). In the latter case this error will disappear as soon as you fix the original problem.

If this error occurred in a script section of your document, you should probably read this FAQ entry.

✘ **Line 185, Column 46:** required attribute "type" not specified

```
<script language="javascript" src="quotes.js"></script><br />
```

The attribute given above is required for an element that you've used, but you have omitted it. For instance, in most HTML and XHTML document types the "type" attribute is required on the "script" element and the "alt" attribute is required for the "img" element.

Typical values for type are
type="text/css" for <style>
and type="text/javascript" for <script>.

✘ **Line 186, Column 13:** there is no attribute "size"

```
<hr size="1" noshade color="#C2956C">
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✘ **Line 186, Column 25:** "noshade" is not a member of a group specified for any attribute

```
<hr size="1" noshade color="#C2956C">
```

✘ **Line 186, Column 31:** there is no attribute "color"

```
<hr size="1" noshade color="#C2956C">
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict"

document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✖ **Line 186, Column 41:** end tag for "hr" omitted, but OMITTAG NO was specified

```
<hr size="1" noshade color="#C2956C">
```

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with "/>" instead of ">".

📍 **Line 186, Column 4:** start tag was here

```
<hr size="1" noshade color="#C2956C">
```

✖ **Line 195, Column 40:** value of attribute "method" cannot be "GET"; must be one of "get", "post"

```
<form action="search.php" method="GET" style="margin-bottom: 0">
```

The value of the attribute is defined to be one of a list of possible values but in the document it contained something that is not allowed for that type of attribute. For instance, the "selected" attribute must be either minimized as "selected" or spelled out in full as "selected="selected""; a value like "selected="true"" is not allowed.

✖ **Line 196, Column 223:** document type does not allow element "input" here; missing one of "p", "h1", "h2", "h3", "h4", "h5", "h6", "div", "pre", "address", "fieldset", "ins", "del" start-tag

```
...f(this.value == '') this.value='Search site';" value="Search site" size="12" />
```

The mentioned element is not allowed to appear in the context in which you've placed it; the other mentioned elements are the only ones that are both allowed there and can contain the element mentioned. This might mean that you need a containing element, or possibly that you've forgotten to close a previous element.

One possible cause for this message is that you have attempted to put a block-level element (such as "<p>" or "<table>") inside an inline element (such as "<a>", "", or "").

✘ **Line 197, Column 83:** there is no attribute "border"

```
...earch" src="images/search.gif" border=0 alt="search site" value="0" width="26"...
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✘ **Line 197, Column 83:** an attribute value specification must be an attribute value literal unless SHORTTAG YES is specified

```
...earch" src="images/search.gif" border=0 alt="search site" value="0" width="26"...
```

✘ **Line 197, Column 119:** there is no attribute "width"

```
...images/search.gif" border=0 alt="search site" value="0" width="26" height="11">
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

 **Line 197, Column 131:** there is no attribute "height"

```
...images/search.gif" border=0 alt="search site" value="0" width="26" height="11">
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

Line 197, Column 135: document type does not allow element "input" here; missing one of "p", "h1", "h2", "h3", "h4", "h5", "h6", "div", "pre", "address", "fieldset", "ins", "del" start-tag

```
...images/search.gif" border=0 alt="search site" value="0" width="26" height="11">
```

The mentioned element is not allowed to appear in the context in which you've placed it; the other mentioned elements are the only ones that are both allowed there and can contain the element mentioned. This might mean that you need a containing element, or possibly that you've forgotten to close a previous element.

One possible cause for this message is that you have attempted to put a block-level element (such as "<p>" or "<table>") inside an inline element (such as "<a>", "", or "").

✖ Line 197, Column 136: end tag for "input" omitted, but OMITTAG NO was specified

```
...images/search.gif" border=0 alt="search site" value="0" width="26" height="11">
```

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with "/>" instead of ">".

◆ Line 197, Column 3: start tag was here

```
<input name="submit" type="image" class="search" src="images/search.gif" bord...
```

✖ Line 200, Column 43: there is no attribute "color"

```
... <div id="navigation"><p><font color="#C2956C"><strong>HOME</strong></font></...>
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute,

(Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the `<embed>` element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✘ Line 200, Column 52: element "font" undefined

```
...<div id="navigation"><p><font color="#C2956C"><strong>HOME</strong></font></p>
```

You have used the element named above in your document, but the document type you are using does not define an element of that name. This error is often caused by:

incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Frameset" document type to get the "`<frameset>`" element),
by using vendor proprietary extensions such as "`<spacer>`" or "`<marquee>`" (this is usually fixed by using CSS to achieve the desired effect instead).
by using upper-case tags in XHTML (in XHTML attributes and elements must be all lower-case).

✘ Line 218, Column 12: ID "footer" already defined

```
<div id="footer"></div>
```

An "id" is a unique identifier. Each time this attribute is used in a document it must have a different value. If you are using this attribute as a hook for style sheets it may be more appropriate to use classes (which group elements) than id (which are used to identify exactly one element).

◆ Line 190, Column 14: ID "footer" first defined here

```
<div id="footer"></div>
```

✘ Line 220, Column 94: there is no attribute "LANGUAGE"

```
...on Development Trust <SCRIPT LANGUAGE=JavaScript>d = new Date(); thedate = d.g...
```

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or

by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the FAQ item on valid flash.

✖ **Line 220, Column 94:** an attribute value specification must be an attribute value literal unless SHORTTAG YES is specified

```
...on Development Trust <SCRIPT LANGUAGE=JavaScript>d = new Date(); thedate = d.g...
```

✖ **Line 220, Column 104:** element "SCRIPT" undefined

```
...ment Trust <SCRIPT LANGUAGE=JavaScript>d = new Date(); thedate = d.getFullYear...
```

You have used the element named above in your document, but the document type you are using does not define an element of that name. This error is often caused by:

incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Frameset" document type to get the "<frameset>" element),

by using vendor proprietary extensions such as "<spacer>" or "<marquee>" (this is usually fixed by using CSS to achieve the desired effect instead).

by using upper-case tags in XHTML (in XHTML attributes and elements must be all lower-case).
